Kind words from some of our families

"I just wanted to let you know how happy we are with our mother's monument. You all did a great job, and the customer service was excellent. Thank you so much."

"Thank you for all of your help and guidance. Evan's headstone is perfect, exactly what I wanted. I know he would have loved it too."

"A big thank you...you helped our family during the most difficult time of our lives and we now have something to look at in the cemetery that represents both my brother and sister perfectly. We are so grateful."

Made to endure...

KIRKPATRICK
STONWORKS

Established in 1929, **Kirkpatrick Stoneworks** continues to celebrate life, love and remembrance through a tradition spanning thousands of years... memorialization.

As your leading monument builder in the area with convenient locations to serve you, we believe that information and education is the key to making an informed decision. Together, we are confident we can help you make the right choice.

Kirkpatrick Stoneworks is proud to have been chosen as the Rock of Ages "Exclusive Retailer" for the Niagara Region, and Haldimand and Norfolk Counties. What does this mean? It means that only we can offer guaranteed quality on the stone through the strongest, most comprehensive perpetual warranty offered in the monument industry today, with their distinctive line of Sealmark memorials. Rock of Ages is the largest granite manufacturer in North America. Not only do they own their own quarries, selecting the finest material for their Exclusive Retailers, but they also select the best granite from all over the world that will meet their high standards of quality and workmanship.

In recent years, memorials fabricated overseas (cut, shaped, polished, etc.) have flooded the Canadian market. While the memorials appear to be more reasonably priced, they are not necessarily good value because the material itself and the methods of manufacture are not proven. We can obtain these products for our families as others have chosen to do, but we will be honest about where they are made. In our opinion though, offering Canadian manufactured memorials is not only an established way to go, it keeps jobs in Canada and that just makes sense.

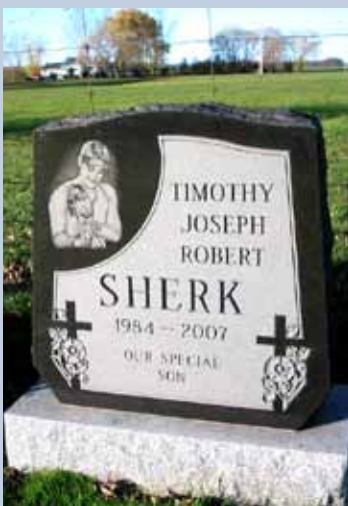

Quality

How do you define quality in a memorial?

It starts with the granite. Do not be fooled into thinking all granite is the same. There are second and third grades of granite, granites that are artificially dyed, and some that change colour or pit or flake over time. This, in part, contributes to poor quality in a memorial.

Kirkpatrick Stoneworks believes a memorial is meant to last forever; therefore we are very selective in choosing only the highest quality granites, to avoid such issues.

Workmanship

Another important factor in defining quality is the workmanship. Carving and lettering a monument the right way will avoid any issues with legibility in the future. We choose to use the "double process" style of carving, which is well regarded in the industry as the best, environmentally friendly method of carving designs and lettering into granite. Simply put, this technique produces clearer, sharper lettering, and vivid detailed designs without the use of paints, dyes, hi-lite, or litho to artificially enhance the stone. Each monument is pinned to the base for extra safety and stability.

Honest Value

Our prices are competitive with any. We provide monuments at every price to suit every circumstance and we have more... a history of durable quality monuments and a reputation for fair business practice.

Personalization

Ideally, no two monuments should be the same because no two individuals are the same...that's our philosophy. You won't feel pressured into buying a "floor model" at Kirkpatrick Stoneworks because we prefer to take your thoughts and ideas and create something truly unique for your loved one. In fact, most custom design work is no extra cost at all.

Us vs. "Them"

In our opinion, no memorial should ever be painted to enhance the lettering, or design. Forty years ago, we learned that this practice was short sighted. Everyone now knows paint, dye or other artificial colouring doesn't last. You are taking great care in choosing your loved one's memorial, and frankly, they deserve the best. By using proper techniques, taking into consideration the colour of the granite, we apply the most appropriate style of carving the lettering and design so that it will last forever.

"Us"

This picture shows two of our methods of carving lettering, so that it is crisp and legible. No paint or dye is used.

"Them"

This picture shows two types of "their" lettering and the result when that paint wears.

"The bitterness of poor quality remains long after the sweetness of low price"
